About Me

Innovative Product Engineer specializing in front-end development with a proven track record of creating impactful, high-performance applications for both mobile and desktop platforms. Experienced in building dynamic solutions across industries—from fintech and e-commerce to AI-driven task automation—using cutting-edge technologies like Flutter, React, and Tauri. Recognized for excellence during my studies, including top graduate distinctions in national programs, and certified as a Google Associate Android Developer. Known for delivering seamless user experiences and crafting reliable, scalable applications with a strong focus on detail and user needs.

Skills

Flutter : Riverpod, BLOC, GetX, Provider

React : ReactJS, NextJS

Android : Jetpack Compose, MVVM, Koin/Dagger
